

DLWPRO

**THREE-BELT DYNAMIC
WEIGHT CHECKING SYSTEM**

DLWPRO

S E R I E S

The “DLWPRO” high-performance weight checking system is the ideal solution for dynamically and accurately weighing and checking all packages transiting on a conveyor line to save time and money.

DLWPRO is designed for dynamically weighing packaged products. For use in factories and MID type-approved, features include integral batch monitoring and statistic reports for supervising production.

PC-based and running Windows® operating system, it is extremely user-friendly. Its touchscreen operator interface makes it easy to use.

DLWPRO is designed and made entirely in Italy. It is the best choice to ensure effective and complete production batch control in order to certify product quality.

WITH METAL DETECTOR

EASY TO USE:

The metal detector module is managed directly from the main touchscreen. Advantages include:

- Simpler and faster calibration and configuration.
- Contamination control records with summary report.
- “Supermarket” sensor management (ejection confirmation, air presence in compressed-air circuit check, full reject tank check).
- Sensor management for compatibility with M&S (Marks & Spencer) and Tesco specifications.

FLEXIBLE AND EXPANDABLE:

- Wide range of metal detector models according to the product to be checked.
- Possibility of implementing all the devices needed to meet M&S and Tesco requirements.

M&S & TESCO compliant
